**FOR IMMEDIATE RELEASE**

**April 9, 2014**

**NEWARK POLICE DEPARTMENT TAKING BACK UNWANTED PRESCRIPTION DRUGS  
April 26 AT NEWARK SENIOR CENTER**

**Newark, DE** (April 9, 2014) – On April 26, from 10 a.m. to 2 p.m., the Newark Police Department, University of Delaware Office of Public Safety, and the Drug Enforcement Administration (DEA) will give the public another opportunity to prevent pill abuse and theft by ridding their homes of potentially dangerous expired, unused, and unwanted prescription drugs. Bring your medications for disposal to the Newark Senior Center at 200 White Chapel Drive or the UD Office of Public Safety at 413 Academy Street. The service is free and anonymous, no questions asked. Sharpies and syringes **will not** be accepted at the collection locations due to potential hazards posed by blood-borne pathogens.

Last October, Americans turned in 324 tons (over 647,000 pounds) of prescription drugs at over 4,114 sites operated by the DEA and its thousands of state and local law enforcement partners. When those results are combined with what was collected in its seven previous Take Back events, DEA and its partners have taken in over 3.4 million pounds—more than 1,700 tons—of pills.

This initiative addresses a vital public safety and public health issue. Medicines that languish in home cabinets are highly susceptible to diversion, misuse, and abuse. Rates of prescription drug abuse in the U.S. are alarmingly high, as are the number of accidental poisonings and overdoses due to these drugs. Studies show that a majority of abused prescription drugs are obtained from family and friends, including from the home medicine cabinet. In addition, Americans are now advised that their usual methods for disposing of unused medicines—flushing them down the toilet or throwing them in the trash—both pose potential safety and health hazards.

DEA is in the process of approving new regulations that implement the Safe and Responsible Drug Disposal Act of 2010, which amends the Controlled Substances Act to allow an “ultimate user” (that is, a patient or their family member or pet owner) of controlled substance medications to dispose of them by delivering them to entities authorized by the Attorney General to accept them. The Act also allows the Attorney General to authorize long term care facilities to dispose of their residents’ controlled substances in certain instances.
