

WEEKLY REPORT

On June 21, 2015 at approximately 11:10 p.m., a 2011 Ford Escape driven by 76 year old man from Alpha, NJ was westbound on West Main Street approaching the intersection of South Main Street, West Main Street and New London Road. The Ford Escape made a right turn onto the gravel rail bed of the CSX railroad located in that intersection and became stuck. Two Newark police officers were working an extra duty job at the Deer Park Tavern and observed the vehicle turn onto the rail line. These officers immediately ran over and contacted the driver, at which time, the warning indicators began to flash and the gate arms came down indicating an approaching train. The officers were able to quickly usher the driver safely away from the vehicle. An eastbound CSX train then struck the vehicle and pushed it all the way to North College Avenue before dislodging from the train. The CSX train safely came to a stop. No one was injured during this collision. Alcohol is not considered a factor in this collision. The investigation into this incident by the Newark Police Department Traffic Unit is continuing.

Members of the police department, along with several agencies and departments, will be participating in an upcoming meeting organized by the City Manager's Office to discuss suggestions for improvements to the Main Street railroad crossing.

On June 24, 2015 at 4:45 a.m. there was a residential burglary on East Park Place. An alert sent out by UDPD inadvertently announced the incident as a home invasion.

Patrol officers were very busy during the severe storm that occurred the evening of June 23rd. Most of the traffic lights were out in the downtown area. Officers did a great job of directing traffic while standing in the pouring rain, with lightning and thunder overhead.

Chief Tiernan and Deputy Chief Feeney will be attending a meeting at the New Castle County Office of Emergency Management next week. The meeting will be a briefing from the Delaware Emergency Management Agency on the announcement for opening a Pre-Disaster Mitigation Program administered by FEMA.
